### INVENT

We work together to create, improve and implement services, events and initiatives to improve student life.

### ADVOCACY

We listen to the student body to best understand their concerns, ideas and understandings about their needs as students. We then lobby these needs to the institution as well as municipal and provincial government bodies.

### PLANNING

We take all of our learnings and strategically plan for the years to come so that students are always set up for success. We are constantly learning, striving and planning to be better.

### COMMUNITY

Our goal is to bring community to the students at Northwestern Polytechnic so that students aren't always expected to find it themselves. We strive to garner as much community involvement in our initiatives so that students always have a network to fall back on.

# INTRODUCTION
